THE FIRST CHOICE IN TELECOMMUNICATIONS AND NETWORKS

IP55 outdoor enclosures

➤ Double paneled, robust and sturdy aluminum extruded framework. Outdoor enclosures provide maximum protection against harsh environmental conditions, vandalism, EMC and extreme thermal conditions. This product series is ideal whenever maximum protection is needed.

Protection from harsh environmental conditions

IP55 outdoor enclosures protect your valuable and sensitive equipment which needs special protection against rain, snow, wind, sun or earthquakes. Thanks to optimum corrosion resistance, your investments are safeguarded for now and in the future.

Protection against EMI (Electromagnetic Interference)

IP55 enclosures are effective against electromagnetic emissions and simultaneously protect the surrounding equipment from emitted radiation.

Protection against thermal extremes

Hot or cold, the IP55 outdoor enclosures maintain your equipment at its optimum operating temperature. Possible with special paint to enhance heat radiation and reflection.

Protection against vandalism, forcible entry and damage

IP55 outdoor enclosures are safe from unwanted access thanks to their robust construction and quality material with concealed hinges. They are covered with special anti-graffiti, anti-poster substance.
